

ADITYA KUMAR

MERN Stack Web Developer

📞 +91 9504022167 ✉ aditya12186@gmail.com 🌐 [GitHub](#) 📍 Noida, Sector-70, UP – 201301

ABOUT ME

Full-stack developer skilled in building scalable applications, backend APIs, and modern user interfaces using React. Strong debugging and problem-solving abilities, currently contributing to production-level development as a Web Development Intern.

EDUCATION

- **Master of Computer Applications (MCA)**

Lovely Professional University - Jul 2023 to Aug 2025 | Percentage: 70%

WORK EXPERIENCE

- **Technical Support Engineer** - Ramp Display Solutions Pvt Ltd | Noida | May-2023 - July-2025.

- Resolved complex technical issues for end-users and internal teams with a 95% satisfaction rate.
- Reduced average ticket resolution time by 30% through efficient troubleshooting and documentation.
- Played a key role in driving support excellence, contributing to a 20% increase in customer retention.

- **MERN Stack Trainee** - Ducat, Noida Sector-63 | Jun 2025 – Oct 2025

- Built full-stack MERN applications with CRUD & authentication
- Developed server-side APIs & integrated frontend with backend services
- Used Git, GitHub & Postman for development workflows and debugging
- Learned deployment & modern development practices

- **Web Development Intern** - Cactus Web Solution, Noida Sector-62 | Nov 2025 – Present

- Engineering MERN-based modules, UI components, and server-side APIs
- Debugging, optimising application issues, and handling version control with Git/GitHub
- Collaborating with the development team to build and deploy production-ready features

SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6), React.js, Vue.js, Bootstrap, Tailwind
- **Backend:** Node.js, Express.js, MongoDB, REST APIs, MVC, PHP, MySQL
- **Tools:** Git & GitHub, VS Code, Postman, Cloudinary, Render
- **Soft Skills:** Teamwork, Problem-Solving, Communication, Time Management, Quick Learner

ACHIEVEMENTS

- Integrated Cloudinary & real-time APIs to boost feature performance
- Designed responsive frontend layouts using React, Bootstrap & modern JavaScript
- Engineered secure APIs and improved MongoDB query efficiency
- Completed 4-month full-stack training and delivered real client features in a production workflow

PROJECT

StayBooking

[Live](#)

- Built a full-stack vacation rental platform with user authentication, property listing features, and a responsive host dashboard to add, edit, and manage listings, integrating Cloudinary for image uploads.
- Enhanced user experience by developing a clean UI, secure workflows, and efficient data handling.
- Implemented Geoapify Maps API to display property locations and enhance UX.

Weather-Finder

[Live](#)

- A dynamic weather application that fetches and displays current weather data based on the user's location. Users can also search weather details by city name.
- Integrated the API to obtain live weather details, including temperature, moisture content, wind velocity, and atmospheric conditions.
